

General Purpose Water Baths

Water Baths. Simplicity and consistency in economy or digital.

Basic lab equipment doesn't have to be rudimentary. PolyScience General Purpose Water Baths are a sleek, cleanly designed addition to your bench offering absolute control, precision and convenience. Operation is totally straightforward. Not only can you set temperatures of up to 100°C, but you can also clearly view the readout on a bright LED display that allows you to recall your set-point temperature with just the press of a button. In addition, you can store up to three temperature set-points that you use most often.

You'll also appreciate the user-friendliness we've built in. Like the steeply gabled, polycarbonate cover that accommodates glassware of varying heights, tilts out of the way when you're loading or unloading samples and allows condensate to drain neatly back into the bath. Not on your work surface.

PolyScience Water Baths, available in a range of capacities from 2 liters to 28 liters in both economy and digital models, provide the perfect blend of scientific accuracy and utility for day-to-day laboratory tasks.

General Purpose Water Baths – Digital

PolyScience General Purpose Water Baths offer excellent temperature control, range, and uniformity. Easy to use Digital Temperature Controller features three temperature pre-sets for one-touch selection of frequently used set-points plus a user-settable high limit alarm that alerts you if the bath temperature exceeds pre-set limits.

Key Specifications

Temperature Range: Ambient +5° to 100°C

Temperature Uniformity: $\pm 0.2^{\circ}\text{C}$

Temperature Stability: $\pm 0.25^{\circ}\text{C}$

Features:

- Hinged gable cover
- Digital Temperature Controller with 3 pre-sets for frequently used temperatures
- Calibration capability
- Local lockout helps prevent unauthorized set-point changes
- Reservoir sizes from 2 to 28 liters
- Primary and automatic safety thermostats
- Shaking bath option (20 L and 28 L baths)

Adjustable pre-sets make selecting commonly used temperatures as simple as pressing a button.

See-through gable cover accommodates flasks and other tall sample vessels, tilts out of the way when opened to allow condensate to drain back into the bath.
